## **DETAILED ACTION**

## Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1, 5, 6, 10-13, 16, 27-30, 72, and 73, drawn to a paclitaxel composition.

Group II, claims 31 and 32, drawn to a method of manufacturing the composition of Group I.

Group III, claims 33, 37, 38, 42, 43, 48-51, 54, 65-69, 74, drawn to a paclitaxel composition with an emulsifier.

Group IV, claims 70 and 71, drawn to a method of manufacturing the composition of Group III.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: there is no special technical feature since U.S. Patent 6,531,139, teaches a composition comprising a monoolein, an oil, and paclitaxel.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

The paclitaxel-based formulation (claim 11) further limiting the additive to: (i) a type of insoluble drug, (ii) an alcohol, or (iii) a polyol, as cited in claim 12.

Art Unit: 4133

The paclitaxel-based formulation (claim 12) further limiting the insoluble drug to one of those cited in claim 13.

The paclitaxel-based formulation (claim 13) further limiting the insoluble drug to one of those cited in claim 16.

The method of preparing the paclitaxel-based formulation (claim 1) further limiting the means for speeding up dissolution process: (i) heating mixture of step 1, or (ii) heating and sonicating the mixture of step 2.

The paclitaxel-based formulation (claim 49) further limiting the additive to: (i) a type of insoluble drug, (ii) an alcohol, or (iii) a polyol, as cited in claim 50.

The paclitaxel-based formulation (claim 50) further limiting the insoluble drug to one of those cited in claim 51.

The paclitaxel-based formulation (claim 51) further limiting the insoluble drug to one of those cited in claim 54.

The method of preparing the paclitaxel-based formulation (claim 66) further limiting the means for speeding up dissolution process: (i) heating mixture of step 1, (ii) heating the mixture of step 2 or (iii) heating and sonicating the mixture of step 2.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 4133

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

The paclitaxel-based formulation (claim 11) further limiting the additive to: (i) a type of insoluble drug, (ii) an alcohol, or (iii) a polyol, as cited in claim 12.

The paclitaxel-based formulation (claim 12) further limiting the insoluble drug to one of those cited in claim 13.

The paclitaxel-based formulation (claim 13) further limiting the insoluble drug to one of those cited in claim 16.

The method of preparing the paclitaxel-based formulation (claim 1) further limiting the means for speeding up dissolution process: (i) heating mixture of step 1, or (ii) heating and sonicating the mixture of step 2.

The paclitaxel-based formulation (claim 49) further limiting the additive to: (i) a type of insoluble drug, (ii) an alcohol, or (iii) a polyol, as cited in claim 50.

The paclitaxel-based formulation (claim 50) further limiting the insoluble drug to one of those cited in claim 51.

The paclitaxel-based formulation (claim 51) further limiting the insoluble drug to one of those cited in claim 54.

Art Unit: 4133

The method of preparing the paclitaxel-based formulation (claim 66) further limiting the means for speeding up dissolution process: (i) heating mixture of step 1, (ii) heating the mixture of step 2 or (iii) heating and sonicating the mixture of step 2.

The following claims are generic: 11-13, 28, 49-51, and 66.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: there is no special technical feature since U.S. Patent 6,531,139, teaches a composition comprising a monoolein, an oil, and paclitaxel.

No telephone call was made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103 (a) of the other invention.

Art Unit: 4133

The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. <u>All</u> claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained.

Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.

Art Unit: 4133

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 4133

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey T. Palenik whose telephone number is (571) 270-1966. The examiner can normally be reached on 7:30 am - 5:00 pm; M-F (EST).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jeffrey Stucker can be reached on (571) 272-0911. The fax phone number for the organization where this application or proceeding is assigned is 571-270-2966.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
